Influenza A [H1N1]

World Health Organization has reported 15,510 laboratory confirmed cases of influenza A/H1N1 infection from 53 countries as on 29<sup>th</sup> May 2009. There have been 99 deaths. Country-wise details annexed. (There is no further update from WHO till 14.00 hrs IST)

Health screening of passengers coming from affected countries is continuing in 21 International airports. 49503 passengers have been screened on 31.5.2009. Around 21236 passengers were from affected countries. 213 doctors and 98 paramedics have been deployed to man 79 counters at the above airports. One passenger who arrived at Bangalore airport was shifted to the isolation facility. Till date about 12.30 lakh passengers have been screened.

So far samples of 123 persons have been tested. This includes the one which tested positive for Influenza A [H1N1]. The rest have been found negative for re-assorted Influenza A [H1N1]. Samples of four persons are under process.

Out of 127 persons, 46 were identified through health screening at International Airports and the rest were samples from persons who have self reported.

The situation is being monitored.
